

△ ESSENTIALS

Stick Root Rake

Features

- 1. Gorse Teeth**
Helps grip onto well rooted vegetation
- 2. Efficiently Designed Profile**
Straighter designer used less plate when manufacturing which brings down the price
- 3. Rigid Design**
Rigid design makes it strong for use in harsher conditions

If you're looking for a reliable and efficient way to clear roots, debris, and other materials from your job site, look no further than our Cobra Essentials Stick Root Rakes.

Designed to work seamlessly with your excavator, our root rakes are made from high-quality materials and engineered for durability, making them the perfect tool for clearing land, preparing construction sites, and more.
